26th of February
between 2pm and 8pm
Buchan Braes Hotel

Community Information Day

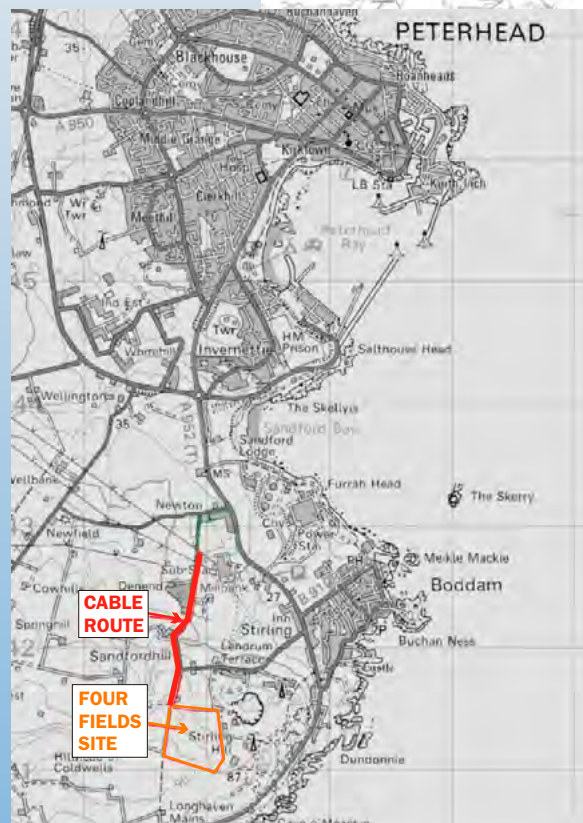

We would like to invite you to come and meet the team and discuss the important issues and priorities for you regarding the Interconnector Converter Station proposed for the 'Fourfields' site west of Stirling Hill Quarry and Alternating Current (AC) Cable Route.

To be held on the 26th of February
between 2pm and 8pm
in the Buchan Braes Hotel.

..... All Welcome

If you cannot attend but wish to get involved, then the information provided will be available on the website after the 26th of February along with details on how to provide feedback.

NORTHCONNECT
CONNECTING RENEWABLES

 **NORTHCONNECT** is a commercial venture set up to develop, build, own and operate a High Voltage 'Interconnector'.

The 1.4 gigawatt (GW) Interconnector will provide an electricity transmission link between Scotland and Norway. Electricity can be transmitted in either direction across the North Sea.

The Converter Station is proposed for the 'Fourfields' site west of Stirling Hill Quarry. The AC cables will run underground to connect to a new extension proposed for the Peterhead Sub-Station site near to the Power Station.

The concept design and main findings of the Environmental Impact Assessment of the proposed development will be presented at the session.

We look forward to discussing the project with you on the 26th of February 2015
